Expenditure list Master's degree course Scientific Instrumentation

Dear prospective student,

The master degree course "Scientific Instrumentation" is a two years course (4 semesters).

The summer term 2023 semester fees presently amount to 261.03 EUR, which includes the public transport in the larger region around Jena. There is an additional one-time fee of 15 EUR for the student ID card (THOSKA).

Visa regulations require a blocked account with a minimum balance of 11,208 EUR and the remark that the account holder can dispose of a monthly amount of 934 EUR. The amount is based on the assumed monthly standard requirement fixed in the Bundesausbildungsförderungsgesetz (BAföG) §13 plus the obligatory health insurance. The average amount of 934 EUR per month consist of:

- Basic needs 452 EUR,
- Accommodation 360 EUR and
- Health insurance 122 EUR.

Considering a regular duration of 2 years and an assumed monthly standard requirement of 934 EUR, a minimum amount of 22,416 EUR will presumably be needed to cover your expenses. Please consider that the assumed monthly standard requirement fixed in the Bundesausbildungsförderungsgesetz (BAföG) §13 as well as the amount charged for the obligatory health insurance are subject to change. Expenses may also significantly vary, depending on the individual lifestyle.

Sincerely,

Dr. Danny von Nordheim
