

### **Course Description: Waste Treatment and Resource Efficiency**

<b>Department</b>	Industrial Engineering
<b>Degree programme</b>	<ul style="list-style-type: none"> <li>• Environmental Technology &amp; Development</li> <li>• Environmental Technology</li> </ul>
<b>Module name</b>	Waste Treatment and Resource Efficiency
<b>Module number</b>	WI-B.420
<b>Compulsory/ optional/ elective module</b>	Compulsory module
<b>Module coordinator</b>	Prof. Dr.-Ing. Matthias Schirmer
<b>Learning objectives</b>	<p>The students will</p> <ul style="list-style-type: none"> <li>• Get a deep knowledge of waste treatment and recycling</li> <li>• Get an understanding of the resource potential of waste and residues and the impact of circular economy for developed and emerging countries</li> <li>• Be able to compare and evaluate different waste treatment methods</li> <li>• Be able to apply methods of balancing energy and materials</li> <li>• Be able to calculate emission factors and carbon footprint of production processes and products</li> <li>• Get a knowledge of different technologies of increasing energy and material efficiency</li> </ul>
<b>Module content</b>	<p><b>Part Waste Treatment</b></p> <ul style="list-style-type: none"> <li>• Waste and recycling statistics</li> <li>• Waste legislation</li> <li>• Unit operations in recycling processes</li> <li>• Waste incineration and waste to energy</li> <li>• Waste disposal</li> <li>• Waste reduction</li> <li>• impact of circular economy in emerging countries</li> </ul> <p><b>Part Resource Efficiency</b></p> <ul style="list-style-type: none"> <li>• Material &amp; energy balances</li> <li>• Emission factors, Carbon Footprint</li> <li>• Potential of energy efficiency (CHP, cooling, compressed air, heat pump, heat insulation)</li> <li>• Energy and material efficient production</li> <li>• Global material flows and transportation</li> <li>• Strategy „ressource efficient europe“</li> </ul>
<b>Course type (lecture, exercises, seminar, practical course)</b>	0L - 1E - 4S - 0P
<b>Recommended literature</b>	<p>/1/ Bilitewski, B.: Abfallwirtschaft – Handbuch für Praxis und Lehre, 4.Auflage, Berlin 2010</p> <p>/2/ Ploetz,C./ Reuscher, G./ Zweck, A.: Mehr Wissen – Weniger</p>

	Ressourcen, Düsseldorf 2009 /3/ Fresner, J.: Ressourceneffizienz in der Produktion: Kosten senken durch Cleaner Production /4/ Haas H.D./ Schlesinger D.M.: Umweltökonomie und Ressourcenmanagement, Darmstadt 2007 /5/ Transferstelle Bingen (Hrsg): Rationelle und regenerative Energienutzung, Heidelberg 2006
<b>Learning materials</b>	overhead transparency, blackboard, computing program
<b>Method(s) of instruction/ media being used</b>	excursions
<b>Level/ category</b>	Bachelor
<b>Which semester (winter/ summer term)</b>	Summer term
<b>Which semester during the programme</b>	4 <sup>th</sup> . semester; half of semester SW 8-15
<b>Requirements for attendance</b>	
<b>Assessment (written/ oral test, paper, etc.)</b>	alternative examination: tests
<b>ECTS credits</b>	6
<b>Work load in:</b>	75 h of contact hours 105 of self-study
<b>Usability of this module</b>	<ul style="list-style-type: none"> <li>• Environmental Technology &amp; Development</li> <li>• Environmental Technology</li> </ul>
<b>Frequency of offer</b>	yearly
<b>Duration of module</b>	1 semester
<b>Place/ room</b>	EAH Jena
<b>Time</b>	According to schedule
<b>Language(s)</b>	English
