

Arduino Workshop at the StartUpLab

 *Open to everyone – not limited to university members!*

Learn how to use Arduino to create simple microcontroller and IoT applications!

Topics include:

- The Arduino development environment
- Microcontroller software and hardware
- Typical Arduino program structure
- Arduino libraries
- Various hands-on projects to choose from - depending on your level of knowledge and interest
- You're also welcome to bring your own Arduino project if you have one!

Please bring your own laptop and install the free Arduino software in advance: <https://www.arduino.cc>

18 June 2025 | 1:00–3:00 PM (open end)

StartUpLab, Building 4, Floor 0, Room 04.00.21

Speaker: Dipl.-Inf. Christian Kauhaus
